GRAVITRAX PRO VERTICAL STARTER SET

Take the action with the GraviTrax interactive track system to new heights with GraviTrax PRO.

Fun

Skill development

Ease of use

Age: 8+ years

What our experts think:

This Gravitrax Pro set is great for encouraging children to explore key principles of physics such as gravity and magnetism, while developing their logical thinking skills.

As children progress, more complex construction sets like this are a fantastic way to encourage creative problem solving, as they challenge them to be more innovative in their approaches to make things work. They also help them start to use a more advanced version of trial and error, as they make predictions and alter their approach based on what has gone wrong or right, which develops their critical thinking skills too.

The set also provides great opportunities for collaboration – it was lovely to see the children working together to build the track and get the ball to roll along successfully, and they got a great sense of achievement when it worked.

Skills developed:

- Great for introducing children to principles of Physics
- Develops logical thinking skills
- Encourages children to work together

"It's a power plant station and these are the robot operators." Boy aged 9

"Don't put the balls in until we have built it all..... Now release the balls" Girl aged 10
